Vladimir Traigel

Senior Software Engineer | Backend Specialist in NestJS, React, & Golang | Building Scalable, Secure Solutions
Belgrade, Serbia

Summary

With over a decade of experience in full-stack web development, I specialize in backend solutions with expertise in Node.js, React, Golang, and real-time applications. My current role as a Senior Software Engineer at Arbio involves developing a scalable B2B2C platform for property rentals, driving backend architecture, and optimizing CI/CD pipelines with AWS. I thrive in roles where I can elevate systems' efficiency and security, from database management to integration with AWS services. My career has been marked by successful project launches, team leadership, and significant contributions to high-profile projects that have raised substantial investments and achieved streamlined, automated processes.

Let's connect to discuss how my skills in NestJS, RabbitMQ, and application architecture can support your business's growth and technical innovation.

Experience

Arbio

Senior Software Engineer
March 2024 - Present (9 months)

Lead backend development for a B2B2C rental platform, utilizing NestJS and React to enhance property rental management; manage AWS-based CI/CD pipelines using GitHub Actions, implement secure infrastructure components, and contribute to the creation of a role-based CMS; contributed to securing €3M in funding and growing the platform to over 650 listings

Andersen Lab

Full Stack Developer
March 2022 - March 2024 (2 years 1 month)

Instrumental in transition from monolithic systems to microservices, contributing to scalability and stability of services; collaborated on projects that supported expansion into new markets, reaching \$3.5M in annual revenue

IXR

Back End Developer

September 2021 - March 2022 (7 months)

Integrated 3PL courier services to enhance flexibility and cost-efficiency; wrote Unit and API tests for stable application performance, liaised with business partners, and monitored and resolved incidents

FreshCredit®

Back End Developer

November 2020 - September 2021 (11 months)

Integrated banking systems, helping users find optimal credit products; improved service flexibility and usability for end-users

least.sale

Web Development Team Lead

June 2019 - November 2020 (1 year 6 months)

Managed backend and frontend development, focusing on scaling backend infrastructure and integrating MongoDB clusters; led CI/CD management, improving team productivity and code quality

Phenom

Full Stack Developer

October 2018 - April 2019 (7 months)

Supported a crypto exchange project with a balanced focus on frontend and backend development; contributed to Phenom's participation in the Binance Hackathon, helping the team reach the finals

WhenSpeak

2 years 3 months

Team Leader (Web Development)

August 2017 - October 2018 (1 year 3 months)

Led a team of five in backend development, unit testing, and deployment processes; optimized WebSocket and RTMP server configurations and managed team tasks with Git

Full Stack Web Developer

August 2016 - October 2018 (2 years 3 months)

Reikartz – International Hotel Chain

Web Developer

August 2015 - August 2016 (1 year 1 month)

Maintained and developed hotel websites using Python Django, MongoDB, and MySQL; executed template design, website support, and database management for a booking service

MitLabs

Web Developer

March 2014 - August 2015 (1 year 6 months)

Developed e-commerce websites with Magento and WordPress, creating modules and plugins to improve functionality; work included REST API integration and deployment management

AT Consulting

2nd Line SQL Support, Team Leader, Junior Developer

September 2012 - March 2014 (1 year 7 months)

Quickly advanced to team lead, managing a team of four and deploying updates to Oracle databases; maintained high service reliability through troubleshooting and SQL optimization

Education

International Institute of Computer Technology (IICT)

Master's degree, Computers, Complexes, Systems, Networks · (2011)
